CRY2623M Fixed Acoustic Imager

Introduction

CRY2623M Fixed Acoustic Imager uses microphone array beamforming technology to obtain sound source distribution data, and cooperates with high -definition cameras to capture video images in realtime.

CRY2623M can help users realize remote monitoring system based on local network (LAN, WIFI, etc.), wide area network (WAN, ADSL, 4G and private network, etc.),and help users realize industrial digital transformation, and support remote real-time monitoring of video images. As such, this provides facilities with further insight into product quality or safety issues, as well as the ability to rapidly detect them.

Features

- Gas leak monitoring for critical assets
- PD monitoring & PD type recognition
- IP66 rating
- Real-time fault alarm triggering
- Powerful Web-based software platform

Highlights

- **24/7 Real-Time monitoring**

  CRY2623M offers continuous, round-the-clock real-time monitoring, which is essential for industries that require constant surveillance of acoustic data and anomalies, such as manufacturing plants, energy facilities, and critical infrastructure.

- **Gas/Vacuum leak detection**

  CRY2623M excels in gas leak detection, offering pinpoint accuracy in locating leaks. By leveraging advanced acoustic technology, it detects the ultrasound emitted by escaping gases, accurately identifying the precise source of the leak.

- **PD localization & PD type recognition**

  Providing advanced capabilities for partial discharge (PD) localization and type recognition, the CRY2623M is essential for evaluating the integrity of electrical insulation in high-voltage equipment.

- **Integration with Robotic Dogs & Wheeled Robots**

  Integrating the CRY2623M with robotic dogs and wheeled robots significantly amplifies monitoring and surveillance capabilities across diverse environments.

- **Powerful, web-based software platform**

  The web-based software platform is engineered to offer robust monitoring and analysis capabilities, facilitating efficient data management and insightful diagnostics. It enables continuous data collection, secure storage, and real-time analysis of acoustic signals.

- **IP66 rating**

  CRY2623M's IP66 rating demonstrates its superior dust and water resistance, making it ideal for harsh industrial environments. This rating guarantees that the device withstands both fine dust and powerful water jets.

Technical Specifications

Acoustic Specification

Microphone array	128 channels MEMS microphone
Frequency range	2kHz-48kHz
Dynamic range	0.5dB-12dB user adjustable
Test sound pressure level range	28-120dBA
Test distance	0.5-50m

Minimum leakage

Distance to Sound Source(m)	Leakage CCM(±1)
0.5-2	28
2-4	46
4-6	47
6-8	50
8-10	53
10-12	66
12-14	70
14-16	78
16-18	90
18-20	97

General Specifications

Size	183*169*85 mm
Weight	1.6 kg
IP rating	IP66
Storage	8G internal, 64G TF card expansion
Operationg enviroment	-20℃ – +60℃, 10%-95% no cond.
Power Consumption	14W
Fixed way	Bottom 1/4 -20 UNC thread/M5 screw fixing
Fixed way	Bottom 1/4 -20 UNC thread/M5 screw fixing
Port	RJ45

Software

Development protocol	RESTful、websocket、RPC
Streaming protocol	RTSP、RTMP、webrtc
Language	Chinese, English

Platform

Platform	Web-based platform, VMS software platform

Ordering Information

Name	Model	Describe
ATEX Industrial Acoustic Imager	CRY2623	Applied to gas leakage scenarios, with gas leakage estimation function and PRPD recognition.
Acoustic Imaging Camera	CRY8124	Detect non-explosive gas leaks and partial discharge.
EX Acoustic Imaging Camera	CRY8125	IECEx certified
Ultrasound generator	IA1101	Simulate gas leaks or partial discharge for system calibration.
Thermal imaging camera module	IA1301/1302	Resolutions of 384×288 and 640×512 are available.
Smart battery pack	IA2001	Single battery provides 5h operation.
Smart battery charger	IA2101	Charges 1 battery at a time. Lightweight, small size design.
